Floodwater Management Grant Program Contractor/Engineer Resources List

April 2018

The San Francisco Public Utilities Commission (SFPUC)'s Floodwater Management Grant Program ("Grant Program") helps San Francisco property owners minimize the risk of flooding on their properties from heavy rainstorms. We encourage you to take advantage of the Grant Program and prepare your property for storms. The Grant Program has been expanded and revised to make it even more accessible to property owners. One improvement is providing resources to property owners to identify Contractors and Engineers who may be able to perform the floodproofing-related work.

This Resource List consists of Contractors and Engineers who have experience performing the types of flood-proofing projects that are funded by the Grant Program (see [Floodwater Grant Program – Example Concepts](#)). This Resource List serves as an optional reference point for property owners to identify experienced Contractors and Engineers and obtain bids for potential grant-funded projects on their private properties. Property owners may contact any Contractor or Engineer directly to discuss their properties, make appointments, and request references.

Property owners are **NOT** required to work with a Contractor or Engineer on this list to participate in the Grant Program. Property owners may collaborate with their existing Contractors/Engineers. SFPUC does not endorse or otherwise recommend these particular Contractors or Engineers.

Floodwater Management Grant Program Contractor/Engineer Resource List
