### 1.0 Policy

Policy compliance activities are (a) acceptance and document signed-off by all responsible parties that the Work has been fully completed in accordance with the Contract Documents, (b) finalization of all paperwork/documentation pertaining to the SFPUC Infrastructure construction contracts, and (c) archiving.

This CM Procedure applies to all personnel working on the SFPUC Infrastructure projects during the construction phase to the extent that their Work is affected by these CM Procedures and does not conflict with specific San Francisco Public Utilities Commission (SFPUC) policies or the contract under which the Work is executed.

### 2.0 Description

This CM Procedure outlines the process by which verification is made of the satisfactory completion of the following Work in accordance with the Contract requirements. These Work items include CM records, construction contract records, Record Documents, and retention of essential project documentation, among other; refer to Attachment 021 – 1, SFPUC Infrastructure CM Project Close-out Check List Guidelines.

### 3.0 Definitions

#### 3.1 Final Completion

Final Completion is the date of written acceptance of the Work when all contractual and administrative requirements have been fulfilled including remaining Punch List items identified at Substantial Completion. The date
of this milestone is recommended by the RE and approved by the Senior PM.

A sample memorandum format for “Project Turnover – Final Completion” is provided on Attachment 021 – 3.

3.2 **Punch List**

3.3.1 Punch List/Substantial Completion is a document prepared by the RE with the assistance of lead inspector and transmitted to the Contractor indicating the items that must be completed before the construction is finished and ready for turn-over/occupancy by the Owner/Operator. This Punch List is compiled subsequent to the Contractor notifying the RE that the Work is Substantially Complete; refer to Attachment 021-6.

3.3.2 Punch List/Final Completion is a document, that includes a list of all items of Work and close-out requirements, prepared by the RE and transmitted to the Contractor that must be completed prior to Final Acceptance. Final Contractor Payment is made when the Punch List/Final Completion have been addressed to meet the project design requirements in the contract.

3.3.3 The principle generators of the independent CM team Punch List are the Lead Inspector, Senior Environmental Monitor, OR, FCA, PE and the OE. The Punch List is reviewed and accepted by the RE.

3.4 **Substantial Completion**

Substantial Completion is the milestone in the progress of the Work, when the Work is sufficiently complete in accordance with the Contract Documents, including completion of start-up services, submittal of warranties, guarantees and record documents; and receipt of a temporary certificate of occupancy, if applicable, issued by the RE so that the Work (or a specified part thereof) can be utilized for the purposes for which it is intended.

A sample memorandum format for “Project Turnover – Substantial Completion” is provided on Attachment 021 – 2.

4.0 **Responsibilities**

4.1 **Contractor**

The Contractor is responsible for performing and completing the Work in accordance with the Contract Documents, including the successful completion of the items on the punch list prepared by the RE, demobilization from the project site, and the submittal of all required warranties and remaining project documents required by the Contract Documents.
4.2 Environmental Inspector
The Environmental Inspector inspects and verifies that the status of construction activities is in compliance with the California Environmental Quality Act (CEQA). The Environmental inspector provides Punch List items to the Lead Inspector.

4.3 Lead Inspector
The Lead Inspector leads and documents the Substantial Completion and Final Completion field inspection construction activities for the RE. These field inspections shall be combined with the other inspection reports into the overall Project Punch List.

4.4 Office Engineer (OE)
The OE confirms the completion, submittal and acceptance of Contract Document deliverables, including Final Contractor Record Documents, Operations and Maintenance Manuals, equipment spare parts and warranties, as required for Substantial Completion and Final Completion.

4.5 Owner/Operations Representative
The Owner/Operations Representative shall be present during facility walk-through for Substantial and Final Completion Inspections, Punch List generation, system testing and facility start-up.

4.6 Resident Engineer (RE)
The RE is responsible for certifying that Contractual Interim Milestones have been achieved. These responsibilities include: reviewing the Contractor’s request for Certification of Substantial Completion; issuing required Punch Lists; issuing Notice of Substantial Completion; confirming when the Contractor has satisfied requirements for Final Completion and issues the corresponding certification; submitting a Project History and Lessons Learned Report; and reviewing, organizing and delivering the project files to the Senior PM.

4.7 Project Engineer (PE)
The PE coordinates the design team participation and inspection for the facility Punch List generation and Final Completion Acceptance of Work.

4.8 Senior Project Manager (Senior PM)
The Senior PM is responsible for defining Contractual interim milestones and ensuring that all necessary requirements are clearly described in the Contract Documents; manages the final completion of the project; inputs the Lesson Learned reports; and delivers the project files submitted by the RE to the Infrastructure Records Management for archiving.
5.0 **Implementation**

5.1 **Contractual Interim Milestones/Substantial Completion**

Contractual Interim Milestones involve an isolated component or part of the Work that is required to be operational or fully restored prior to Substantial Completion, or is required to be achieved before critical system shutdowns can occur. The process to be followed for certifying achievement of Contractual Interim Milestones is similar to that to be followed for Substantial Completion, refer to Attachment 021-7.

5.1.1 Prior to Substantial Completion a Close-out Meeting shall be initiated. This meeting shall be scheduled when the RE determines that Work is 90% complete based on Daily Inspection Reports and Construction Progress Schedule.

5.1.2 Contractor submits formal request for Contractual Interim Milestone Completion or Substantial Completion to the RE in accordance with procedures set forth in the Contract Documents.

5.1.3 RE conducts inspection of Work completed by Contractor, determines completeness of Contractor's submittals as required by the Contract Documents, and determines if Work is sufficiently completed to certify either Contractual Interim Milestone completed or Substantial Completion.

5.1.4 RE prepares and transmits to the Contractor a Punch List/Substantial Completion of incomplete or non-conforming Work discovered during inspection for the Contractual Interim Milestone Completion or Substantial Completion, items required to be satisfactorily resolved for acceptance. RE will distinguish between those items that must be resolved for the requested completion and those that may be deferred to Final Completion.

5.1.5 RE prepares and issues a Notice of Substantial Completion, and issues the “Punch List/Final Completion”, refer to Attachment 021-2.

5.2 **Final Completion**

5.2.1 Contractor submits written notice for Final Completion certifying to the fact that: All Work has been completed in conformance with the Contract Documents; all Punch List items outstanding from Substantial Completion have been completed; demobilization and cleanup of the project site(s) has been completed; and the Work is ready for Final Inspection.

5.2.2 Contractor shall provide all O&M Manuals and materials and equipment Warranty information for all Contractor supplied/installed equipment (standard Punch List items) to the Project CMRE who will turn them over to the Operations Representative (Owner/Operator), refer to Attachment 021-3.
5.2.3 Final Inspection shall be performed by the RE and CM Team in conformance with Contract Documents as supported by the Contractor's written Notice of Completion.

5.2.4 RE verifies Contractor has submitted: all required O&M Manuals, equipment data sheets and spare parts, materials and equipment Warranty information for all Contractor supplied/installed equipment; evidence of releases for all subcontractor and vendor liens, all remaining project documents required by the Contract Documents, including Final Contractor Record Documents; final statement of accounting, certified payroll records and a final change order (if required) showing adjustments to the Contract Cost for all force account work, allowance items and other outstanding change issues; and a request for Final Payment.

5.2.5 RE prepares a Notice of Final Completion,

5.2.6 The RE shall recommend to City that final payment, including release of all held retention money, be issued to the Contractor.

5.3 **Project Administration Close-out and Turnover**

5.3.1 RE prepares and submits the final Project History and Lessons Learned Report to the Senior PM in accordance with CM Procedure No. 020, Project History/Lessons Learned.

5.3.2 Senior PM inputs the final Project History and Lessons Learned Report to the database.

5.3.3 ADCS reviews maintained project files, including electronic and hard copy files and documents, removes duplicate file records, indexes the file records, and delivers the project file records to Central Records Management Center.

5.3.4 RE submits to the Senior PM all warranties received from the Contractor in compliance with the Contract Documents.

5.3.5 RE transmits approved Final Contractor Record Documents to Engineer. These drawings are stamped by RE to read “Certified that these Final Contractor Record Documents represent the facilities as constructed” in accordance with CM Procedure No. 033.

5.3.6 After updating the original contract drawing by SFPUC EMB, the PE or Bureau personnel transmits the final drawing version (Record Drawings and As—Builts) to Engineering Archives for reproduction and then to the Owner/Operations Representative stamped Final Project Record Documents.

MEMORANDUM

Date:

To: Name of Owner/Operator

From: Name of Senior Project Manager

Subject: Contract No. and Title of Project(s)
Project Turnover – Substantial Completion

On date, the SFPUC and the Owner conducted an Inspection of the project and found the project to be substantially complete. As such, the project is henceforth turned over to the Owner for usage and commencement of maintenance and security responsibility. The Punch List Items (attach if desire) identified during the Inspection will be corrected.

O&M Manuals have been transmitted to the Owner. Final Contractor Record Documents and Warranties /Guarantee information will be sent in the near future or by date. Final Project Record Documents to be done by SFPUC Engineering Management Bureau will be sent upon completion.

(Insert other items worth noting.)

*SFPUC Infrastructure CM Procedure No. 021, Revision 0, Page 13 of 17*
The following personnel listed (by project position or responsibility) for Documents Distribution is a general guideline for specific CM Procedure. It is the responsibility of the ADCS to confirm and as necessary revise this list as appropriate for the specific project needs. The OE shall approve these distribution changes.

The guideline for hard copy document distribution is follows:

1. Individual, without CMIS access, who attended a specific project meeting.
2. Individual, without CMIS access, who was mentioned or designated for action in a specific project meeting.
3. Individual, without CMIS access who has management oversight responsibilities to ensure the implementation or completion of project action.

SPECIAL REPORTS:

Final Project History/Lessons Learned

DISTRIBUTION:

Project Field Personnel – Information Only, Not Distribution
- RE, ADCS, Operations Representative

Construction Management Bureau
- CM

Program CM Consultant
- Program CM Consultant Advisor

Project Management Bureau
- Senior PM, PM

Engineering Management Bureau
- PE

Bureau of Environmental Management
- Senior Environmental Coordinator

Others
- Contracts Administration Bureau
