Next Steps

The Upper Yosemite Creek Project team is currently finishing the planning phase of this project. This phase of the project includes the conceptual design, preliminary interagency coordination, and public outreach components of the project. Next, the project will move into the detailed design phase before beginning construction.

**Planning Phase**

During the planning phase, the project team has focused on working with the community and city agencies to determine the most appropriate footprint for this project. We have held 5 community meetings including this one, and coordinated with many different agencies including: Public Works, Rec & Park, SFMTA, and SF Planning.

**Design Phase**

During the design Phase, the project team will advance the design and construction details in order to prepare a construction documentation set of drawings. The specific design elements, such as material color, construction methods, and construction coordination will be developed during this phase. Additionally, environmental impact review will be completed for this project.

**Bid & Construction Phase**

At this phase in the project, a contractor will be selected to build the project and construction will begin. The project team will provide oversight during construction, and care will be taken to minimize impacts to the surrounding neighborhood and park. Once construction is complete, Upper Yosemite Creek will be open to the public!
Get Involved!

There are things you can do to help reduce the amount of stormwater going into the combined sewer system.

Help Build Green Infrastructure Projects Near You!
Join the SFPUC as we plan, design and build Green Infrastructure projects in the city: www.sfwater.org/greeninfrastructure.

Urban Watershed Stewardship Grants
Apply for grant funding for your community based project which will help manage stormwater! Small actions by community members add up to large benefits for San Francisco’s Watersheds and sewer infrastructure: www.sfwater.org/watershedgrants.

Use Green Technologies at Home
Learn how to capture and reuse your rainwater at home for irrigation and help keep stormwater out of the combined sewer system: www.sfwater.org/rainwater.

Laundry to Landscape Subsidy Program
Don’t let good water go to waste. Irrigate your backyard with “graywater” from your laundry machine: www.sfwater.org/graywater.

Get a Sidewalk Garden on Your Block!
Gather your neighbors and get a free Sidewalk Garden. Apply with our partners at Friends of the Urban Forest: www.fuf.net/sidewalk.

Make a Lasting Impact!
Be a part of San Francisco’s long-term planning process of sewer system improvements for the next twenty years. To get involved, visit: sfwater.org/urbanwatersheds.

Connect with the SFPUC to help improve local stormwater management and assist the SSIP.
