Headworks Facility Project: 30 Day Construction Notice

What: The City's Sewer System Improvement Program (SSIP) includes the Headworks Facility Project, one of the major upgrades at the Southeast Treatment Plant (SEP). The project will replace, and consolidate, the two existing outdated Headworks facilities, which will help minimize odors, reduce operational costs, and increase the SEP's efficiency.

When/Where: Starting the first week of January 2018, the SFPUC and its contractor will begin a variety of construction activities on the Headworks Facility Project that will include: equipment and trailer staging, improvements to the sewer lines under Evans and Davidson Avenues and Quint and Rankin Streets, improvements to the Bruce Flynn Pump Station located at the northeast corner of Evans Avenue and Quint Street, and construction inside the SEP to prepare for and construct the new facilities. Construction intensity and hours will fluctuate, and regular advisories will be mailed to keep the community informed. Project completion is anticipated May 2023.

Who: Sundt/Walsh Joint Venture (JV) is the contractor working for the San Francisco Public Utilities Commission on this project.

What to expect during construction:
• There will be noise, vibration, dust, and traffic impacts in the work zone.
• Residents near the work zone will maintain access to their homes and businesses.
• Parking will be prohibited in the work zone and traffic controls will be used to direct traffic around construction.

Please see posted signs for exact details.
• A city construction inspector will be on-site during work hours. Inspectors typically wear a yellow safety vest and hard hat.

About the Sewer System Improvement Program (SSIP)

The Sewer System Improvement Program (SSIP) is a 20-year, multi-billion dollar citywide investment required to upgrade our aging sewer system. The Program is the result of an eight year community planning process and will ensure a reliable, sustainable, and seismically safe sewer system now and for generations to come.
