Public Notice – Soil Sampling Work

What: San Francisco’s combined sewer system collects and treats both sewage from homes and businesses and stormwater runoff when it rains. The Folsom Area Stormwater Improvement Project, currently in the planning and design phase, proposes to upsize sewer system capacity in various locations around the Inner Mission to reduce the risk of flooding during heavy rains. In late June, the San Francisco Public Utilities Commission (SFPUC) will conduct field investigations and gather soil samples for the Project using truck-mounted drilling equipment at various locations in the parking strip, bike lane and/or travel lane using necessary traffic control.

Who: Pitcher Services and Gregg Drilling are the contractors working for the SFPUC on this project.

When: Work will begin in late June and is anticipated to complete late August. Sampling work at each location will last between 1-3 days.

Where: Sampling work will occur in various locations of the project area below.

What to expect during soil sampling:

- Work will include traffic control at various locations.
- During soil sample collection, noise is elevated and involves the dropping of a hammer onto the sampling equipment over short periods of time. All noise and vibration will adhere to City ordinance levels.
- Businesses and residents in the work zone will maintain access to their garages, although there may be temporary delays.
- Posting of “No Parking Signs” at least 72 hours in advance where drilling is planned in parking spaces.
- No interruption in water service or quality is expected during construction.

The Sewer System Improvement Program (SSIP) is a 20-year, multi-billion dollar citywide investment required to upgrade our aging sewer infrastructure to ensure a reliable and seismically safe sewer system now and for generations to come. For more information visit sfwater.org/SSIP.
Clean, efficient, reliable...

Every day, we deliver high-quality, efficient water, power and sewer services to serve the needs of the San Francisco Bay Area.

**Water** – Delivering high-quality water every day
We deliver drinking water by gravity to 2.6 million people and businesses in San Francisco, Alameda, Santa Clara, and San Mateo counties.

**Power** – Generating clean energy for vital City services
We generate clean, reliable energy to power vital City services, such as MUNI, streetlights, schools and public buildings.

**Sewer** – Protecting public health and the environment
Through our treatment system and innovative programs, we manage sewage and stormwater, and prevent pollution of the bay and ocean.

Please help conserve water.
