10-Day Construction Notice – CSD Rehabilitation

Description: As part of the Sewer System Improvement Program, the San Francisco Public Utilities Commission (SFPUC), will continue construction to rehabilitate the Sansome Street Combined Sewer Discharge (CSD) structure. Construction will occur below ground and within the CSD structures. Surface impacts will be limited to staging equipment and safety barriers above the structure to protect workers. Day work during low tide conditions may occur.

Contact: SFPUC Communications, (888) 801-2661, ssip@sfwater.org. After hours: Trinet Construction, Inc., (415) 740-9584, jacktrinet@yahoo.com. For more information visit sfwater.org/csdrhabilitation.

When: The anticipated start date for construction is May 2020 with completion scheduled for September 2020. Weather and/or construction issues may impact the schedule. Workdays and hours (weather Permitting) are Monday – Friday, 8:00 p.m. to 5:00 a.m. Some day work and weekend work may be required.

Where: This work will occur within subsurface CSD structures at Sansome Street and The Embarcadero between Pier 29 and 31, and at Bay Street between Pier 31 and 35.

What to expect:
- While the contractor is required to abide by the City’s noise and vibration ordinances, neighbors should expect some noise and limited dust during this work. The project team will work to minimize disruption to normal neighborhood activity; however, there will be occasional inconveniences due to heavy equipment movement and other construction activities.
- Night work will occur from 8:00 p.m. to 5:00 a.m. and will require closure of two lanes along the east side of The Embarcadero (northbound).
- Day work during low tide conditions may occur and require partial closure of the Embarcadero sidewalk at Pier 29.
- Businesses and residents in the work zone will maintain access to their properties (including entries, driveways, garages), although there may be temporary delays.
- Parking will be restricted in the work zone. Please see posted signs for exact details.
- No interruption in sewer service is expected during construction.

Sewer improvements are funded through the Sewer System Improvement Program (SSIP) – a 20-year, multi-billion dollar citywide investment required to upgrade our aging sewer infrastructure to ensure a reliable and seismically safe sewer system now and for generations to come. For more information visit sfwater.org/SSIP.
