30-Day Construction Notice – Force Main Rehabilitation at Embarcadero and Jackson Improvements

Description: As part of the Sewer System Improvement Program, the San Francisco Public Utilities Commission (SFPUC), will begin construction on the Force Main Rehabilitation at Embarcadero and Jackson Improvements Project. The purpose of the project is to complete the rehabilitation of the North Shore Force Main that serves 350,000 customers in the northeastern part of San Francisco. These improvements are necessary to ensure the sewer system continues to reliably serve and protect the health and safety of the community and environment.

Contact: SFPUC Communications, (888) 801-2661, ssip@sfwater.org. After hours: please call 3-1-1. For more information visit sfwater.org/fmej.

When: The anticipated start date for construction is as early as mid-June 2020 with completion scheduled for winter 2021 (estimated construction duration is 18 months). Weather and/or construction issues may impact the schedule. Workdays and hours (weather permitting) are Monday – Friday, 7:00 a.m. to 4:00 p.m. Some day night and weekend work may be required.

Where: This work will occur within subsurface structures on The Embarcadero between Pier 1 and 7. Partial lane closures along the Embarcadero will be necessary to ensure the public and worker safety during construction (see map on reverse side). Expect delays, consider alternate routes, and plan ahead if you must travel through the area.

What to expect:
- **Expect traffic delays along the Embarcadero.** Streets will stay open for traffic throughout construction, with reduced traffic lanes and optional detour routes available.
- Service in the area will NOT be interrupted during construction.
- No street parking near construction zones. “No-parking” signs will be posted 72 hours in advance.
- No bus impacts are expected at this time.
- Follow posted signage on site. Businesses and residents in the work zone will maintain access to their driveways and entrances during construction.
- Work will be conducted in compliance with the San Francisco Noise Ordinance. Most construction work is expected to be performed during daytime hours.
- If necessary, odor control measures will be in place during construction.

Sewer improvements are funded through the Sewer System Improvement Program (SSIP) – a 20-year, multi-billion dollar citywide upgrade of our aging sewer infrastructure to ensure a reliable and seismically safe sewer system now and for generations to come. For more information visit sfwater.org/SSIP.
