Subject: Final Lake or Streambed Alteration Agreement
Notification No. 1600-2014-0353-R3
Pacific Rod and Gun Club Upland Soil Remedial Action Project

Dear Mr. Nzewi:

Enclosed is the final Streambed Alteration Agreement ("Agreement") for the Pacific Rod and Gun Club Upland Soil Remedial Action project ("Project"). Before the Department may issue an Agreement, it must comply with the California Environmental Quality Act ("CEQA"). In this case, the Department, acting as a responsible agency, filed a notice of determination ("NOD") on, April 22, 2015 based on information contained in the Mitigated Negative Declaration the lead agency prepared for the Project.

Under CEQA, filing a NOD starts a 30-day period within which a party may challenge the filing agency's approval of the project. You may begin your project before the 30-day period expires if you have obtained all necessary local, state, and federal permits or other authorizations. However, if you elect to do so, it will be at your own risk.

If you have any questions regarding this matter, please contact Suzanne DeLeon, Environmental Scientist, at (831) 440-9433 or Suzanne.deleon@wildlife.ca.gov.

Sincerely,

Craig J. Weightman
Environmental Program Manager
Bay Delta Region

STREAMBED ALTERATION AGREEMENT
NOTIFICATION NO. 1600-2014-0353-R3
Lake Merced

SAN FRANCISCO PUBLIC UTILITIES COMMISSION
PACIFIC ROD AND GUN CLUB UPLAND SOIL REMEDIAL ACTION PROJECT

This Streambed Alteration Agreement (Agreement) is entered into between the California Department of Fish and Wildlife (CDFW) and the San Francisco Public Utilities Commission (Permittee) as represented by Obi Nzewi.

RECITALS

WHEREAS, pursuant to Fish and Game Code (FGC) section 1602, Permittee notified CDFW on September 18, 2014 that Permittee intends to complete the project described herein.

WHEREAS, pursuant to FGC section 1603, CDFW has determined that the project could substantially adversely affect existing fish or wildlife resources and has included measures in the Agreement necessary to protect those resources.

WHEREAS, Permittee has reviewed the Agreement and accepts its terms and conditions, including the measures to protect fish and wildlife resources.

NOW THEREFORE, Permittee agrees to complete the project in accordance with the Agreement.

PROJECT LOCATION

The project is located at 520 John Muir Drive, on the southwest shore of Lake Merced (within South Lake), in southwestern San Francisco, San Francisco County, State of California; Latitude 37.717015” N, Longitude 122.495893” W; Assessor's Parcel Number 7283-004. The project area is approximately 1,500 feet long, 350 feet wide at its western end, and 150 feet wide at its eastern property boundary.
PROJECT DESCRIPTION

The project is limited to remediation of contaminated soil at the Pacific Rod and Gun Club (PRGC) as required by the Regional Water Quality Control Board Site Cleanup Requirements Order No. R2-2013-0023. The soil is contaminated from shotgun shells and clay targets used at the PRGC, both of which contain toxic substances including lead and polycyclic aromatic hydrocarbons. Remediation will consist of excavation and off-site disposal of contaminated soils in upland areas and along the shoreline of Lake Merced. This Agreement covers activities associated with remediation only along the shoreline and in or near freshwater and marsh wetlands.

The PRGC property will be demarcated into 100-foot by 100-foot grid squares and the depth of soil that will be excavated at each grid is dependent upon the concentrations of lead and polycyclic aromatic hydrocarbons at each site. Soil will be excavated to a depth of approximately 0.5 to 4.0 feet, although, at four separate locations the excavation will extend to 7 feet below ground. The estimated total volume of soil to be excavated is approximately 41,000 cubic yards. If additional excavation is needed, the total volume could be up to approximately 46,500 cubic yards. Excavation volumes estimated to be required within wetland areas covered under this Agreement total approximately 5,714 cubic yards.

Materials generated during remediation will be stockpiled on-site, separated according to hazardous waste characterization and either recycled or disposed of in compliance with applicable laws. Material stockpiled will be stored within a bermed area on liner material and covered to prevent windblown dust. Any accumulated water will be collected from a low point within the bermed area and pumped into a portable storage tank. The contained water will be tested and treated, if necessary before disposal. Following separation and characterization for disposal, wastes will be transported offsite to appropriate disposal facilities.

Excavated areas will be backfilled with clean imported fill material and compacted. The backfilled areas will be graded to return the site to conditions similar to the existing site. All construction activities will be conducted from upland areas, including the work conducted in wetland areas along the Lake Merced shoreline. Construction equipment required will include at least two of each of hydraulic excavators, backhoe loaders, and crawler dozers; a wheel loader; 20-cubic yard dump trucks; a flat-bed delivery truck; a forklift; a vibrator and a pickup truck. No equipment will be operated in-water.

Permittee will restore habitat functions and services to approximately 1230 linear feet of wetland and riparian resources impacted by the project in accordance with the October 2014 Riparian and Wetland Restoration and Mitigation Monitoring Plan (RWRMMP), submitted to CDFW for approval.
PROJECT IMPACTS

Existing fish or wildlife resources the project could substantially adversely affect include: bank swallow (BANS), a species listed as threatened under the California Endangered Species Act (CESA), pacific pond turtle (PPT), a State Species of Special Concern; bats; migratory, nesting and foraging birds and temporary and semi-permanent impacts 1,232 linear feet of wetland.

The adverse effects the project could have on the fish or wildlife resources identified above, without implementation of the Measures to Protect Fish and Wildlife Resources specified below, include: potential increase in sediment transport during project activities; increase in turbidity during project activities; risk of pollution in stream habitat; disruption to nesting and foraging PPT and disruption of nesting and foraging birds and bats.

MEASURES TO PROTECT FISH AND WILDLIFE RESOURCES

1. Administrative Measures

Permittee shall meet each administrative requirement described below.

1.1 Documentation at Project Site. Permittee shall make the Agreement, any extensions and amendments to the Agreement, and all related notification materials and California Environmental Quality Act (CEQA) documents, readily available at the project site at all times and shall be presented to CDFW personnel, or personnel from another state, federal, or local agency upon request.

1.2 Providing Agreement to Persons at Project Site. Permittee shall provide copies of the Agreement and any extensions and amendments to the Agreement to all persons who will be working on the project at the project site on behalf of Permittee, including but not limited to contractors, subcontractors, inspectors, and monitors.

1.3 Notification of Conflicting Provisions. Permittee shall notify CDFW if Permittee determines or learns that a provision in the Agreement might conflict with a provision imposed on the project by another local, state, or federal agency. In that event, CDFW shall contact Permittee to resolve any conflict.
1.4 **Project Site Entry.** Permittee agrees that CDFW personnel may enter the project site at any time to verify compliance with the Agreement.

1.5 **Traversing Another Property.** To the extent that any provisions of this Agreement provide for activities that require Permittee to traverse another owner's property, such provisions are agreed to with the understanding that Permittee possesses the legal right to so traverse. In the absence of such right, any such provision is void.

2. **Avoidance and Minimization Measures**

To avoid or minimize adverse impacts to fish and wildlife resources identified above, Permittee shall implement each measure listed below.

2.1 **Seasonal Work Period.** To avoid or minimize adverse impacts to BANS and their foraging habitats, work within the lake and wetland zones shall be limited to July 15 to October 31.

2.1.1 **BANS Work Period Modification.** Work within the lake and wetland zones may begin prior to July 15 if a qualified biologist (see Measure 2.5) determines the BANS have fledged. Permittee shall submit a written request for approval to begin work earlier than July 15, five days prior to commencement of work. Permittee shall send that request to Suzanne Deleon, at suzanne.deleon@wildlife.ca.gov.

2.1.2 **Work Period Modification.** If Permittee needs more time to complete project activities, work may be authorized outside of the work period and extended on a day-to-day basis by CDFW representative, Suzanne Deleon, at suzanne.deleon@wildlife.ca.gov, (831) 440-9433, or if unavailable, through contact with the CDFW Bay Delta Regional Office by mail, phone (707-944-5500) or fax (707-944-5553). Permittee shall submit a written request for a work period variance to CDFW for approval at least seven (7) calendar days prior to October 31. The work period variance request shall: 1) describe the extent of work already completed; 2) detail the activities that remain to be completed; 3) detail the time required to complete each of the remaining activities; and 4) provide photographs of both the current work completed and the proposed site for
continued work. Work period variances are issued at the discretion of CDFW. CDFW will review the written request to work outside of the established work period and may require additional measures to protect fish and wildlife resources as a condition for granting the variance. Any additional measures shall be made part of this Agreement.

2.2 Work Period in Dry Weather Only. Work within the lake and wetland areas shall be restricted to periods of low rainfall (less than ¼" per 24 hour period) and dry weather as allowed during the work period specified in Measure 2.1. Precipitation forecasts shall be considered when planning construction activities. Permittee shall monitor the 72-hour forecast from the National Weather Service (http://www.nws.noaa.gov). When there is a forecast of more than 40% chance of rain, or at the onset of unanticipated precipitation, the Permittee shall remove all equipment and shall implement erosion and sediment control measures and all project activities shall cease.

2.3 Washing of Equipment. In order to prevent the movement of invasive plant and animal species, fungi, and other biotic agents from external ecological regions, the equipment used shall be washed prior to entry and staging onto construction sites.

2.4 Decontamination of Clothing and Equipment. Any equipment that will enter the water during construction shall be decontaminated before and after construction to prevent the spread of aquatic diseases, such as ranavirus, and invasive aquatic species, such as quagga mussel. Workers shall also decontaminate waders, boots and other clothing that will come in direct contact with the water. Decontamination of clothing and equipment shall be done through one or more of the following methods:

- Drying equipment in an upland location following last aquatic use. If average daytime temperatures exceed 80° F, drying times shall be at least 7 days. If average daytime temperatures are below 80° F, drying times shall be at least 30 days;

- Scalding water wash (at least 140° F) with varying high and low pressure spray to dislodge pathogens, vegetation, and contaminated sediment;

- Freezing at a temperature of less than 32° F for more than 72 hours; and/or
Soaking in a hospital-grade disinfectant solution for at least two minutes (or longer, based on product directions). To avoid harm to non-target species, disinfected clothing and equipment shall be thoroughly rinsed in a water bath before entering the stream.

Repeat decontamination is required only if the equipment/clothing is removed from the site, used within a different waterbody, and returned to the project site. Decontamination shall take place in an upland location, and any chemicals used during decontamination shall be prevented from entering water bodies or stormwater drains.

2.5 **CDFW-Approved Qualified Biologist(s) and Biological Monitor(s).**

Within a minimum of 30 days prior to initiating species surveys within the project area, Permittee shall submit to CDFW for written approval, the names and resumes of all qualified biologists and biological monitors involved in conducting surveys and/or monitoring work.

A qualified biologist is an individual who shall have a minimum of five years of academic training and professional experience in biological sciences and related resource management activities with a minimum of two years conducting surveys for each species that may be present within the project area.

A biological monitor is an individual who shall have academic and professional experience in biological sciences and related resource management activities as it pertains to this project, experience with construction-level biological monitoring, be able to recognize species that may be present within the project area, and be familiar with the habits and behavior of those species.

2.6 **Unauthorized Take.** This Agreement does not authorize the take, including incidental take, of any state or federally listed threatened or endangered listed species, or of species that are otherwise protected under FGC. Permittee may be required, as prescribed in the California and U.S. Endangered Species Acts, to obtain take coverage for state and federally listed species prior to commencement of the project. Any unauthorized take of listed species may result in prosecution and nullification of this Agreement.

2.7 **PPT Survey.** Prior to and within 48 hours of the planned start of vegetation removal or ground disturbing activities, a focused survey for PPT shall be conducted by a CDFW-approved qualified
biologist to determine if they are in the area. If this species is found during surveys, CDFW shall be notified immediately, and construction activities shall not begin until approved by CDFW. Through consultation with CDFW, additional protective and mitigation measures may be developed to protect PPT. CDFW reserves the right provide additional measures to this Agreement designed to protect PPT.

2.8 **Monitor On-Site.** If a special-status species such as PPT is found within the immediate project area, a CDFW-approved biological monitor and/or qualified biologist shall be present on the project site while all project activities are being conducted.

2.9 **PPT Avoidance.** Permittee shall install an exclusion fence around the project area. The fence shall consist of a strong erosion control fabric and steel T-posts, plywood, or other suitable material. It should extend approximately six inches below grade and approximately 3.5 feet above ground.

2.10 **Daily Species Inspections.** The biological monitor or qualified biologist shall conduct daily inspections of the excluded project work area, and staging and stockpiling areas prior to the commencement of construction activities for the first two weeks of the project. If the biological monitor or qualified biologist determines that PPT or other sensitive species are not within the work area, equipment or materials may be moved onto the work site and project activities may commence under the direct observation of the biological monitor. If PPT occur repeatedly onsite after the exclusion fencing has been installed, a qualified biologist shall initiate preconstruction sweeps of the project site for this species prior to start of construction on a daily basis and thereafter throughout the duration of the project. If the exclusion fence is found to be effective in excluding the PPT from the work area, the biological monitor or qualified biologist shall conduct twice weekly inspections of the project work area, and staging and stockpiling areas.

2.11 **Daily Fence Inspection.** The exclusion fence shall remain in operating condition throughout the duration of the project. The biological monitor shall inspect the integrity of the exclusion fencing during same schedule as stated in Measure 2.10 to ensure there are no gaps, tears or damage. Maintenance of the fencing shall be conducted as needed throughout the work period. Any necessary repairs to the fencing shall be completed within 24 hours of the initial observance of the damage.
2.12 **Cease Activities for PPT.** Permittee shall exercise measures to avoid direct injury to PPT. If a PPT is observed, all work shall cease within the immediate area where PPT are found, and the PPT shall be left alone to move out of the area on its own. If it does not move on its own or is inside the exclusion fence area, it can be relocated to at least a 250-foot distance away from the project location. Relocation areas shall be of suitable habitat, on shallow banks with slow moving water and shall be far enough away so as not to be affected by project activities.

2.13 **PPT Nesting Avoidance.** In the event PPT are found nesting in the construction work area, no work shall be conducted in that area until after the PPT have hatched and emerged from the nest. If PPT are found over-wintering in the project work area, CDFW shall be notified immediately and construction activities shall not begin until approved by CDFW.

2.14 **Sensitive Plant Exclusion.** If, at any time, a special-status plant species is found, it shall be flagged for avoidance and site-specific avoidance buffers approved by CDFW shall be implemented. All the special-status plants and associated buffer zones shall be avoided during project activities. CDFW may submit additional written avoidance, minimization and mitigation measures if special-status plants are found in the project area. Permittee may be required, as prescribed in the California and U.S. Endangered Species Acts, to obtain take coverage for state and federally listed species prior to commencement of the project. Those additional measures shall be considered part of this Agreement.

2.15 **Nesting Bird Survey.** If project occurs during the nesting season of raptors and migratory birds, a focused survey for active nests of such birds shall be conducted by the CDFW-approved qualified biologist within 15 days prior to the beginning of project-related activities. Surveys shall be conducted in all suitable habitat located at project work sites and in staging and storage areas. The minimum survey radii surrounding the work area shall be the following: i) 250 feet for passerines; ii) 500 feet for small raptors such as accipiters; iii) 1,000 feet for larger raptors such as buteos. The bird survey methodology and the results of the survey shall be submitted to CDFW prior to commencement of project activities.

Nesting seasons are typically defined as followed: i) March 15 to August 30 for smaller bird species such as passerines; ii) February 15 to September 15 for raptors.
2.16 **Active Nests.** An active nest is defined as a nest having eggs or chicks present, or a nest that adult birds have staked a territory and are displaying, constructing a nest, or are repairing an old nest. If a lapse in project-related work of 15 days or longer occurs, another focused survey shall be conducted before project work is reinitiated. If active nests are found, Permittee shall consult with CDFW and the U.S. Fish and Wildlife Service (USFWS) regarding appropriate action to comply with the Migratory Bird Treaty Act of 1918 and the FGC prior to resumption of project activities.

2.17 **Active Nest Buffers.** Active nest sites shall be designated as "Ecologically Sensitive Areas" (ESA) and protected (while occupied) during project activities with the establishment of a fence barrier surrounding the nest site. The typical minimum distances of the protective buffers surrounding each identified ESA are the following: i) 1,000 feet for large raptors such as buteos; ii) 500 feet for small raptors such as accipiters; iii) 250 feet for passerines. A biological monitor or qualified biologist shall monitor the behavior of the birds (adults and young, when present) at the nest site to ensure that they are not disturbed by project-related activities. Nest monitoring shall continue during project-related construction work until the young have fully fledged, are no longer being fed by the parents and have left the nest site, as determined by a biological monitor.

2.18 **Nesting Habitat Removal or Modification.** No trees, shrubs or emergent vegetation shall be disturbed, trimmed or pruned that contain active bird nests until all eggs have hatched, and young have fully fledged (are no longer being fed by the adults, and have completed left the nest site). No habitat modification shall occur within the ESA fenced nest zone even if the nest continues to be active beyond the typical nesting season for the species (refer to Measure 2.15), until the young have fully fledged and will no longer be adversely affected by the project.

2.19 **Special-Status Species Encountered During Work.** If CDFW determines, or if Permittee or the qualified biologist/biological monitor finds, that any special-status wildlife species; including CESA or ESA-listed species or SSC, are present within the specific project area the Permittee is working in, construction work shall stop within the immediate area the special-status species is found, and Permittee or qualified biologist/biological monitor shall notify CDFW and any other appropriate agency. If there is imminent danger of injury to special-status species, such as CRLF or PPT and the individual does not move out of the work area on its own, the qualified biologist shall relocate the individual to suitable habitat.
located at a safe distance away (typically a minimum of 250 feet) from any construction work. For any CESA and/or ESA listed species, only a qualified biologist with the necessary permits issued by CDFW and/or the USFWS can handle and relocate listed species. The qualified biologist shall contact CDFW within 24 hours of relocation activities. Through consultation with CDFW, additional measures may be developed to protect special-status species.

2.20 Designation of Work Area. Prior to project activities, a biological monitor or qualified biologist shall clearly mark/flag or erect temporary construction fencing to designate the work area and to delineate the ESA areas and trees that shall be avoided. Flagging and or temporary construction fencing shall be removed immediately after the completion of construction work.

2.21 Education Session before Commencement of Work. The biological monitor or qualified biologist shall conduct an education session on species that may be present at the project work site. The training shall consist of basic identification of the species, their basic habits, how they may be encountered in the work area, and procedures to follow when they are encountered. Any personnel joining the work crew later shall receive the same training before beginning work. The penalties for noncompliance of conditions in this Agreement shall be relayed to all project personnel.

2.22 Silt Control Measures. Silt control measures shall be utilized throughout all phases of the project where silt and/or earthen fill threaten to enter Waters of the State.

2.23 Silt Control Effectiveness. Silt control structures shall be monitored daily for effectiveness and shall be repaired or replaced as needed. Passage of sediment beyond the sediment barrier is prohibited. If the sediment barrier fails to retain sediment, construction activities shall cease and corrective measures shall be employed.

2.24 Cease Project for Elevation of Turbidity Levels. Upon CDFW determination that turbidity/siltation levels resulting from project related activities constitute a threat to aquatic life, activities associated with the turbidity/siltation shall be halted until effective CDFW-approved control devices are installed or abatement procedures are initiated. CDFW may take enforcement action if appropriate turbidity and siltation control measures are not deployed.
2.25 **Erosion Control Methods.** Erosion protection shall be placed in areas where vegetation cannot reasonably be expected to become re-established. These areas shall be protected with correctly installed erosion control measures (e.g. jute, certified weed-free straw, coconut fiber, or coir logs). Materials containing monofilament or plastic or similar material containing netting shall not be used within the project area due to documented evidence of amphibians and reptiles becoming entangled or trapped in such material.

2.26 **Native Vegetation Seeding and Planting.** All other areas of disturbed soil which drain toward State waters shall be planted with propagules (seeds, cuttings and/or divisions) of locally-collected native plants appropriate for the soil and hydrological conditions of the site. Locally native wildflower and/or shrub seeds may also be included in the planting mix.

2.27 **Prohibited Plant Species.** Permittee shall not plant, seed, or otherwise introduce invasive plant species. Prohibited exotic plant species include those categorized as "High" and "Moderate" in the California Invasive Plant Council's Inventory Database, which is accessible at: [http://www.cal-ipc.org/paf/](http://www.cal-ipc.org/paf/).

2.28 **Staging and Storage Areas.** Building materials and/or construction equipment shall not be stockpiled or stored where they could be washed into the water or where they will cover aquatic or riparian vegetation.

2.29 **Equipment over Drip-pans.** Staging and storage areas for equipment, materials, fuels, lubricants and solvents shall be located away from the wetted areas. Stationary equipment such as motors, pumps, generators, compressors and welders, located within or adjacent to the lake shall be positioned over drip-pans.

2.30 **Maintenance of Vehicles.** Any equipment or vehicles driven and/or operated adjacent to the creek areas shall be checked and maintained daily to prevent leaks of materials that if introduced to water could be deleterious to aquatic life, wildlife or riparian habitat. Vehicles must be moved away 150 feet from the lake prior to refueling and lubrication.

2.31 **Hazardous Materials.** Any hazardous or toxic materials that could be deleterious to aquatic life that could be washed into state waters or its tributaries shall be contained so that it does not leach into the water or removed from the project site.
2.32 **Debris and Waste Disposal.** Permittee/contractor shall not dump any litter or construction debris within the project area. All such debris and waste shall be picked up daily and properly disposed of at an appropriate site.

3. **Compensatory Measures**

To compensate for adverse impacts to fish and wildlife resources identified above that cannot be avoided or minimized, Permittee shall implement each measure listed below.

3.1 **Riparian and Wetland Restoration.** Permittee shall restore at a 1.1:1 ratio and monitor the impacted wetlands and coastal scrub area on-site as described in the Riparian and Wetland Restoration and Mitigation Monitoring Plan submitted to the Department in October 2014.

4. **Reporting Measures**

Permittee shall meet each reporting requirement described below.

4.1 **Special Status Species' Survey Results.** Permittee shall submit to CDFW prior to commencement of project activities, the nesting bird and sensitive species’ surveys and results. Refer to Notification Number 1600-2014-0353-R3 when submitting the report to CDFW.

4.2 **List of Nonnative Species.** Permittee shall submit to CDFW within two weeks of project completion, a list of location and species for any nonnative invasive species found in the project area.

4.3 **Notification to the California Natural Diversity Database (CNDDB).** If any listed, rare, or special status species are detected during project surveys or on or around the project site during project activities, Permittee shall submit CNDDB Field Survey Forms to CDFW in the manner described at the CNDDB website (http://www.wildlife.ca.gov/biogeodata/cnddb/submitting_data_to_cnddb.asp) within 14 working days of the sightings. Copies of such submittals shall also be submitted to the CDFW regional office as specified below.

4.4 **Annual Status Report.** An annual status report on the Riparian and Wetland Restoration and Mitigation Monitoring Plan shall be provided to the CDFW by December 31 of each year as described in the RWRMMP. Refer to Notification Number 1600-2014-0353-R3 when submitting this report to CDFW.
CONTACT INFORMATION

Any communication that Permittee or CDFW submits to the other shall be in writing and any communication or documentation shall be delivered to the address below by U.S. mail, fax, or email, or to such other address as Permittee or CDFW specifies by written notice to the other.

LIABILITY

Permittee shall be solely liable for any violations of the Agreement, whether committed by Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents or contractors and subcontractors, to complete the project or any activity related to it that the Agreement authorizes.

This Agreement does not constitute CDFW’s endorsement of, or require Permittee to proceed with the project. The decision to proceed with the project is Permittee’s alone.

SUSPENSION AND REVOCATION

CDFW may suspend or revoke in its entirety the Agreement if it determines that Permittee or any person acting on behalf of Permittee, including its officers,
employees, representatives, agents, or contractors and subcontractors, is not in compliance with the Agreement.

Before CDFW suspends or revokes the Agreement, it shall provide Permittee written notice by certified or registered mail that it intends to suspend or revoke. The notice shall state the reason(s) for the proposed suspension or revocation, provide Permittee an opportunity to correct any deficiency before CDFW suspends or revokes the Agreement, and include instructions to Permittee, if necessary, including but not limited to a directive to immediately cease the specific activity or activities that caused CDFW to issue the notice.

ENFORCEMENT

Nothing in the Agreement precludes CDFW from pursuing an enforcement action against Permittee instead of, or in addition to, suspending or revoking the Agreement.

Nothing in the Agreement limits or otherwise affects CDFW's enforcement authority or that of its enforcement personnel.

OTHER LEGAL OBLIGATIONS

This Agreement does not relieve Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents, or contractors and subcontractors, from obtaining any other permits or authorizations that might be required under other federal, state, or local laws or regulations before beginning the project or an activity related to it.

This Agreement does not relieve Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents, or contractors and subcontractors, from complying with other applicable statutes in the FGC including, but not limited to, FGC sections 2050 et seq. (threatened and endangered species), 3503 (bird nests and eggs), 3503.5 (birds of prey), 5650 (water pollution), 5652 (refuse disposal into water), 5901 (fish passage), 5937 (sufficient water for fish), and 5948 (obstruction of stream).

Nothing in the Agreement authorizes Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents, or contractors and subcontractors, to trespass.

AMENDMENT

CDFW may amend the Agreement at any time during its term if CDFW determines the amendment is necessary to protect an existing fish or wildlife resource.
Permittee may amend the Agreement at any time during its term, provided the amendment is mutually agreed to in writing by CDFW and Permittee. To request an amendment, Permittee shall submit to CDFW a completed CDFW "Request to Amend Lake or Streambed Alteration" form and include with the completed form payment of the corresponding amendment fee identified in CDFW's current fee schedule (see Cal. Code Regs., tit. 14, § 699.5).

TRANSFER AND ASSIGNMENT

This Agreement may not be transferred or assigned to another entity, and any purported transfer or assignment of the Agreement to another entity shall not be valid or effective, unless the transfer or assignment is requested by Permittee in writing, as specified below, and thereafter CDFW approves the transfer or assignment in writing.

The transfer or assignment of the Agreement to another entity shall constitute a minor amendment, and therefore to request a transfer or assignment, Permittee shall submit to CDFW a completed CDFW "Request to Amend Lake or Streambed Alteration" form and include with the completed form payment of the minor amendment fee identified in CDFW's current fee schedule (see Cal. Code Regs., tit. 14, § 699.5).

EXTENSIONS

In accordance with FGC section 1605(b), Permittee may request one extension of the Agreement, provided the request is made prior to the expiration of the Agreement's term. To request an extension, Permittee shall submit to CDFW a completed CDFW "Request to Extend Lake or Streambed Alteration" form and include with the completed form payment of the extension fee identified in CDFW's current fee schedule (see Cal. Code Regs., tit. 14, § 699.5). CDFW shall process the extension request in accordance with FGC 1605(b) through (e).

If Permittee fails to submit a request to extend the Agreement prior to its expiration, Permittee must submit a new notification and notification fee before beginning or continuing the project the Agreement covers (Fish & G. Code, § 1605, subd. (f)).

EFFECTIVE DATE

The Agreement becomes effective after CDFW's signature, which shall be: 1) after Permittee's signature; 2) after CDFW complies with all applicable requirements under the California Environmental Quality Act (CEQA); and 3) after payment of the applicable FGC section 711.4 filing fee listed at http://www.wildlife.ca.gov/habcon/ceqa/ceqa_changes.html.
TERM
This Agreement shall expire on December 31, 2019 unless it is terminated or extended before then. All provisions in the Agreement shall remain in force throughout its term. Permittee shall remain responsible for implementing any provisions specified herein to protect fish and wildlife resources after the Agreement expires or is terminated, as FGC section 1605(a)(2) requires.

AUTHORITY

If the person signing the Agreement (signatory) is doing so as a representative of Permittee, the signatory hereby acknowledges that he or she is doing so on Permittee's behalf and represents and warrants that he or she has the authority to legally bind Permittee to the provisions herein.
AUTHORIZATION

This Agreement authorizes only the project described herein. If Permittee begins or completes a project different from the project the Agreement authorizes, Permittee may be subject to civil or criminal prosecution for failing to notify CDFW in accordance with FGC section 1602.

CONCURRENCE

The undersigned accepts and agrees to comply with all provisions contained herein.

7. PRIOR NOTIFICATION OR ORDER
A. Has a notification previously been submitted to, or a Lake or Streambed Alteration Agreement previously been issued by, the Department for the project described in this notification?

☐ Yes (Provide the information below)  ☑ No

Applicant: __________________ Notification Number: __________________ Date: __________

B. Is this notification being submitted in response to an order, notice, or other directive ("order") by a court or administrative agency (including the Department)?

☐ No  ☑ Yes (Enclose a copy of the order, notice, or other directive. If the directive is not in writing, identify the person who directed the applicant to submit this notification and the agency he or she represents, and describe the circumstances relating to the order.)

☑ Continued on additional page(s)
2. PROJECT LOCATION

A. Address or description of project location.

(Include a map that marks the location of the project with a reference to the nearest city or town, and provide driving directions from a major road or highway)

The Pacific Rod and Gun Club (PRGC) property is located at 520 John Muir Drive, on the southwest side of Lake Merced, in southwestern San Francisco, California (see Supplemental Information, Figure 1). The center of the site is located at approximately 37.717015° N latitude, -122.495893° W longitude, which can be found on the USGS San Francisco South 7.5-minute topographic quadrangle, as shown on Figure 2, Topographic Map (see Supplemental Information, Figure 2). The site is also identified as City and County of San Francisco (CCSF) lot and block 7283-004. Lake Merced consists of four interconnected freshwater lakes: North Lake, South Lake, East Lake, and Impound Lake. The project site is on the southwest shore of South Lake, Lake Merced (the waterbody). The nearest cross street is Skyline Boulevard to the west. The site is an irregularly shaped parcel between South Lake and John Muir Drive, which trends northwest/southeast. The site is approximately 1,500 feet long, 350 feet wide at its western end, and 150 feet wide at its eastern property boundary.

B. River, stream, or lake affected by the project.  
Lake Merced (South Lake)

C. What water body is the river, stream, or lake tributary to?  
Pacific Ocean (via Vista Grande tunnel)

D. Is the river or stream segment affected by the project listed in the state or federal Wild and Scenic Rivers Acts?

10. PROJECT DESCRIPTION

A. Describe the project in detail. Photographs of the project location and immediate surrounding area should be included.
- Include any structures (e.g., rip-rap, culverts, or channel clearing) that will be placed, built, or completed in or near the stream, river, or lake.
- Specify the type and volume of materials that will be used.
- If water will be diverted or drafted, specify the purpose or use.

Enclose diagrams, drawings, plans, and/or maps that provide all of the following: site specific construction details; the dimensions of each structure and/or extent of each activity in the bed, channel, bank or floodplain; an overview of the entire project area (i.e., “bird’s-eye view”) showing the location of each structure and/or activity, significant area features, and where the equipment/machinery will enter and exit the project area.

The SFPUC proposes to remediate upland soil contamination at the Pacific Rod and Gun Club (PRGC) site, as required by RWQCB Site Cleanup Requirements Order No. R2-2013-0023. Remediation would consist of excavation and off-site disposal of contaminated soils in upland areas and along the shoreline of Lake Merced. Excavations would be backfilled with clean fill material to restore topography. Following remediation, the SFPUC would restore temporarily-impacted riparian and wetland habitats in-place and to pre-project conditions. The project consists solely of temporary construction activities necessary to accomplish soil remediation; there are no operations and maintenance activities or permanent structures associated with the project.

Please see the attached Supplemental Information Block 10A, for additional information.

B. Specify the equipment and machinery that will be used to complete the project.

Construction equipment required would include at least two each of hydraulic excavators, backhoe loaders, and crawler dozers; a wheel loader; 20-cubic-yard dump trucks; a flat-bed delivery truck; a forklift; a vibrator; and a pickup truck. Some types of equipment would be needed only for certain phases of construction. Approximately 50 truck trips would be needed for mobilizing and demobilizing equipment. See Supplemental Info Block 10B for additional information.

C. Will water be present during the proposed work period (specified in box 4.D) in the stream, river, or lake (specified in box 8.B).

D. Will the proposed project require work in the wetted portion of the channel?

□ Yes (Enclose a plan to divert water around work site)
□ No

[Continued on additional page(s)]

[Continued on additional page(s)]
NOTIFICATION OF LAKE OR STREAMBED ALTERATION

11. PROJECT IMPACTS

A. Describe impacts to the bed, channel, and bank of the river, stream, or lake, and the associated riparian habitat.
   Specify the dimensions of the modifications in length (linear feet) and area (square feet or acres) and the type and volume of material (cubic yards) that will be moved, displaced, or otherwise disturbed, if applicable.

Coastal freshwater marsh wetlands and willow riparian scrub along the banks of Lake Merced would be temporarily impacted during soil remediation work. The attached supplemental information provides a detailed discussion of impacts including maps and tables showing the extent of expected temporary impacts. There will be no permanent impacts to waters.

B. Will the project affect any vegetation?

<table>

</tr>
</tbody>
</table>

C. Are any special status animal or plant species, or habitat that could support such species, known to be present on or near the project site?

Yes (List each species and/or describe the habitat below)  No  Unknown

Suitable habitat for special-status plants, bats, western pond turtle, and migratory birds occurs on site. See attached supplemental information.

D. Identify the source(s) of information that supports a "yes" or "no" answer above in Box 11.C.

Site reconnaissance surveys and focused special-status species surveys. See attached information.

E. Has a biological study been completed for the project site?

Yes (Enclose the biological study)  No

Note: A biological assessment or study may be required to evaluate potential project impacts on biological resources.

F. Has a hydrological study been completed for the project or project site?

Yes (Enclose the hydrological study)  No

Note: A hydrological study or other information on site hydraulics (e.g., flows, channel characteristics, and/or flood recurrence intervals) may be required to evaluate potential project impacts on hydrology.
## 12. MEASURES TO PROTECT FISH, WILDLIFE, AND PLANT RESOURCES

### A. Describe the techniques that will be used to prevent sediment from entering watercourses during and after construction.

Best management practices (BMPs) will be implemented during construction according to the Project stormwater pollution prevention plan (SWPPP) that would be submitted and reviewed by the RWQCB before the start of remediation. See attached supplemental information for a full description water quality protection measures and BMPs.

- Continued on additional page(s)

### B. Describe project avoidance and/or minimization measures to protect fish, wildlife, and plant resources.

There will be no permanent impacts (loss) to waters. Avoidance of temporary impacts to jurisdictional waters is not possible if soil remediation is to be accomplished. Avoidance and Minimization measures include pre-construction surveys, fencing, monitoring, and implementation of BMPs and a SWPPP. See attached supplemental information for a full description of avoidance and minimization measures.

- Continued on additional page(s)

### C. Describe any project mitigation and/or compensation measures to protect fish, wildlife, and plant resources.

Following project implementation, temporarily-impacted wetland and riparian habitats and upland coastal scrub along the Lake Merced shoreline would be restored in-place to pre-project conditions, in accordance with a Riparian and Wetland Restoration and Mitigation Monitoring Plan (RWRMMP) subject to approval by the regulatory agencies. See attached Supplemental Information for a detailed description of the proposed mitigation.

- Continued on additional page(s)

## 13. PERMITS

List any local, state, and federal permits required for the project and check the corresponding box(es). Enclose a copy of each permit that has been issued.

NOTIFICATION OF LAKE OR STREAMBED ALTERATION

14. ENVIRONMENTAL REVIEW

| A. Has a draft or final document been prepared for the project pursuant to the California Environmental Quality Act (CEQA), National Environmental Protection Act (NEPA), California Endangered Species Act (CESA) and/or federal Endangered Species Act (ESA)? |
| --- | --- |
| ☐ Yes (Check the box for each CEQA, NEPA, CESA, and ESA document that has been prepared and enclose a copy of each) |
| ☐ No (Check the box for each CEQA, NEPA, CESA, and ESA document listed below that will be or is being prepared) |

| ☐ Notice of Exemption | ☐ Mitigated Negative Declaration | ☐ NEPA document (type): |
| ☐ Initial Study | ☐ Environmental Impact Report | ☐ CESA document (type): |
| ☐ Negative Declaration | ☐ Notice of Determination (Enclose) | ☐ ESA document (type): |
| ☐ THP/ NTMP | ☐ Mitigation, Monitoring, Reporting Plan |

B. State Clearinghouse Number (if applicable) 2014062081

C. Has a CEQA lead agency been determined? ☐ Yes (Complete boxes D, E, and F) ☐ No (Skip to box 14.G)

D. CEQA Lead Agency San Francisco Planning Department

E. Contact Person Timothy Johnston

F. Telephone Number (415)575-9035

G. If the project described in this notification is part of a larger project or plan, briefly describe that larger project or plan.

The Project is not part of a larger project or plan.

☐ Continued on additional page(s)

H. Has an environmental filing fee (Fish and Game Code section 711.4) been paid?

☐ Yes (Enclose proof of payment) ☐ No (Briefly explain below the reason a filing fee has not been paid)

The Notice of Determination (NOD) has not yet been submitted.

Note: If a filing fee is required, the Department may not finalize a Lake or Streambed Alteration Agreement until the filing fee is paid.

15. SITE INSPECTION

Check one box only.

☐ In the event the Department determines that a site inspection is necessary, I hereby authorize a Department representative to enter the property where the project described in this notification will take place at any reasonable time, and hereby certify that I am authorized to grant the Department such entry.

☐ I request the Department to first contact (insert name) Obi Nzewi at (insert telephone number) (415) 554-1876 to schedule a date and time to enter the property where the project described in this notification will take place. I understand that this may delay the Department’s determination as to whether a Lake or Streambed Alteration Agreement is required and/or the Department’s issuance of a draft agreement pursuant to this notification.
NOTIFICATION OF LAKE OR STREAMBED ALTERATION

16. DIGITAL FORMAT

Is any of the information included as part of the notification available in digital format (i.e., CD, DVD, etc.)?

☑ Yes (Please enclose the information via digital media with the completed notification form)

☐ No

17. SIGNATURE

I hereby certify that to the best of my knowledge the information in this notification is true and correct and that I am authorized to sign this notification as, or on behalf of, the applicant. I understand that if any information in this notification is found to be untrue or incorrect, the Department may suspend processing this notification or suspend or revoke any draft or final Lake or Streambed Alteration Agreement issued pursuant to this notification. I understand also that if any information in this notification is found to be untrue or incorrect and the project described in this notification has already begun, I and/or the applicant may be subject to civil or criminal prosecution. I understand that this notification applies only to the project(s) described herein and that I and/or the applicant may be subject to civil or criminal prosecution for undertaking any project not described herein unless the Department has been separately notified of that project in accordance with Fish and Game Code section 1602 or 1611.

NOTICE OF DETERMINATION

TO: Office of Planning and Research
    Post Office Box 3044
    Sacramento, California 95812-3044

FROM: California Department of Fish and Wildlife
    Bay Delta Region
    7329 Silverado Trail
    Napa, California 94558

SUBJECT: Filing of Notice of Determination in compliance with Section 21108 or 21152 of the Public Resources Code

PROJECT TITLE: PACIFIC ROD AND GUN CLUB UPLAND SOIL REMEDIAL ACTION PROJECT

STATE CLEARINGHOUSE NUMBER: 2014062081

LEAD AGENCY: San Francisco Planning Department
CONTACT: Timothy Johnston (415) 575-9035

RESPONSIBLE AGENCY: California Department of Fish and Wildlife (CDFW)
CONTACT: Suzanne DeLeon, Environmental Scientist, (831) 440-9433

PROJECT DESCRIPTION / LOCATION: The project is limited to remediation of contaminated soil at the Pacific Rod and Gun Club (PRGC) as required by the Regional Water Quality Control Board Site Cleanup Requirements Order No. R2-2013-0023. The soil is contaminated from shotgun shells and clay targets used at the PRGC, both of which contain toxic substances including lead and polycyclic aromatic hydrocarbons. Remediation will consist of excavation and off-site disposal of contaminated soils in upland areas and along the shoreline of Lake Merced. The project covered under the Lake and Streambed Alteration Agreement Number 1600-2014-0353-R3 CDFW is executing pursuant to Section 1602 Fish and Game Code, is limited to the activities associated with remediation only along the shoreline and in or near freshwater and marsh wetlands.

This is to advise that the CDFW as a Responsible Agency approved the project described above on April 22, 2015 and has made the following determinations regarding the above described project pursuant to section 15096 (i).

1. The project will not have a significant effect on the environment.
2. CDFW considered the Negative Declaration as previously prepared for this project by the Lead Agency.

This is to certify that a copy of the Mitigated Negative Declaration prepared for this project is available to the general public and may be reviewed at: 1650 Mission Street, Suite 400, San Francisco, Ca 94103.

Please contact the lead agency person specified above.
